

Flu (Shot) Season Around the Corner

Thursday, 03 October 2013 13:18

A little rain, some cooler temperatures, leaves on the ground. Sure signs of autumn. And a flu season on the way. The La Crosse county health department has already released a schedule of flu shot clinics for this month. The clinics will be held through the month at schools in the county. The health department offers influenza shots also through the nursing department. Thirty dollars for adults. Free for children six months and older. The health department says the best way to protect against influenza is to get a flu shot.
