

A La Crosse business group says it supports the idea of hiring a city administrator. The Chamber of Commerce hopes voters consider agreeing to adding a top administrator to city hall. In a statement on Wednesday, the chamber says the value in having a professional city administrator is a higher level of efficiency. The chamber also notes that the city has operated under the same form of government since the 1800's and things have become sufficiently complex to consider changing to a governmental form that includes a professional administrator.
